

Hi, my name is Oler Denis

and I'm a computer technician.

odenis@vu.sc.ug

About me

Hello, I'm Oler Denis, a dedicated and passionate individual with a strong background in education and technology. My educational journey began with obtaining a **Certificate in Grade III Teacher Education**, which laid the foundation for my teaching skills. Additionally, I hold a **Certificate in Videography and Photography**, allowing me to explore my creative side through visual storytelling.

Building on these foundational skills, I pursued and completed a **Diploma in Computer Science**. This diploma not only deepened my understanding of computer systems but also sparked an interest in furthering my studies within this field.

Currently, I am pursuing a **Bachelor of Science in Computer Science at Victoria University Kampala**. This degree program is equipping me with advanced knowledge and skills necessary to excel in the rapidly evolving tech industry.

Throughout my academic pursuits, I have developed strong analytical skills, problem-solving abilities, and an innovative approach to technology integration. My diverse educational background has prepared me well for roles that require both technical expertise and effective communication.

I am excited about the opportunities ahead as I continue to grow professionally and contribute positively to the fields of education and technology.

Skills and Services

Skills

computer technical skills(maintenance and upgrades)
